

FREGO 加热系列 COOKING

FREGO极速烤箱是一款多功能型烤箱，内置预编程菜单，可实现快速烹饪；一体式设计，非常适合快速烹饪、回温、烧烤和烘焙各种新鲜或冷冻食品；是专为现代餐饮场景打造的多功能烹饪利器，集速度、智能与多功能于一体，助力餐厅轻松应对高峰客流，提升出餐效率与品质，打造差异化竞争力！

FREGO High Speed Oven is a multifunctional oven with a pre programmed menu for quick cooking. It is integrated design, perfect for repaid cooking, reheating, grilling, and baking various fresh or frozen foods. It is a multifunctional cooking tool specially designed for modern catering scenes, integrating speed, intelligence, and multifunctionality to help restaurants easily cope with peak-hour demands, improve dining efficiency and quality, and create differentiated competitiveness!

极速烤箱 High Speed Oven

- 烹饪速度比其他烹饪方法快70%，并能按需提供热食
- 配备7"高清宽屏显示器，图标驱动的高清彩色触摸屏控制面板，可无限存储多个步骤的烹饪方案
- 每个烹饪方案可支持多达20个步骤，并且每个步骤都包含可编程的烹饪时间、微波功率设置以及文字图片使用说明
- Cooking speed is 70% faster than other cooking methods and can provide hot food as needed.
- Equipped with a 7 "high-definition widescreen display and icon driven high-definition color touch screen control panel, it can store multiple cooking plans infinitely.
- Each cooking plan can support up to 20 steps, and each step includes programmable cooking time, microwave power settings, and text and image usage instructions.

- 烤箱炉腔尺寸为30.5cm x 30.5cm，宽度为41 cm，具有大炉腔宽度比，并可放置在600mm的工作台上，非常适合小空间内使用
- 可触摸的低温外表面，能安全放置在任何地方
- 配备易于检修的前置式空气过滤器
- 内置催化过滤，可最大限度减少油脂和气味的排放，实现无通风烹饪，无需排风扇，适合前厅操作，运行安静且易于安装
- The oven cavity size is 30.5cm x 30.5cm, with a width of 41 cm, featuring a large cavity width ratio and can be placed on a 600mm workbench table, making it ideal for use in small spaces.
- Touchable low-temperature outer surface that can be safely placed anywhere.
- Equipped with a pre-installed air filter that is easy to maintain.
- Built in catalytic filtration can minimize the emission of oil and odors, achieving non ventilated cooking without the need for exhaust fans. It runs quietly, and is easy to install.

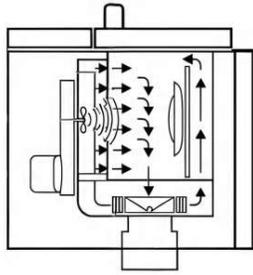

- 自诊断功能可监测零件状态，符合HACCP要求，IoT物联网功能
- 可通过UI轻松更新菜单和传导数据
- 适用于西餐厅、咖啡店、甜品店、快餐店、披萨店、奶茶店、服务站、便利店、连锁餐饮等等
- Self diagnostic function can monitor the status of parts, complies with HACCP requirements and can add IoT function
- Can easily update menus or transfer data by connecting to the cloud through a USB flash drive
- Suitable for Western restaurants, coffee shops, dessert shops, fast food restaurants, pizza shops, service stations, convenience stores, chain restaurants, and more

烤箱包括三种加热技术:
Rapid Cooking Technology combines three heating methods:

- 微波
- 热风对流
- 热风冲击 (热风强制对流)
- Microwave
- Hot air convection
- Hot air impact (forced convection of hot air)

微波:
Microwave:

- 微波设置选项: 关闭 (OFF)、0-100% (以1%为增量)
- 微波分配系统使用旋转有源天线 (微拌式微波), 确保食物均匀受热
- Microwave setting options: OFF, 0-100% (in increments of 1%)
- The microwave distribution system uses a rotating active antenna (stirring microwave), to ensure even heating of food.

对流加热:
Convective heating:

- 温度设置选项: 关闭 (OFF)、30°C至 260°C (以1°C为增量)
- 热分配系统通过热风冲击循环进行, 可确保均匀的焦化和食物上色均匀的效果
- Temperature setting options: OFF, 30 °C to 260 °C (in increments of 1 °C).
- The heat distribution system is carried out through hot air impact circulation, ensuring uniform coking and even coloring of food.
